Why choose Sparkle's Fabric Ignite Packs?

Maximize your Microsoft Fabric investment from day one.

Accelerate Time-to-Value

Start building business impact immediately. Skip the learning curve and focus on delivering results.

Avoid First-Time Pitfalls

Leverage Sparkle's hands-on Fabric expertise to bypass common implementation missteps and inefficiencies.

Implement with Confidence

Our proven frameworks, best practices, and architectural guidance ensure your setup is scalable, future-proof, and aligned with your goals.

Extract Full Value from Microsoft Fabric

We help you unlock the platform's potential, from lakehouse to governance, with a focus on real, usable insights.

Empower Your Team

We don't just build. We transfer knowledge and establish operational excellence for your internal team to grow with Microsoft Fabric.

Summary

Microsoft Fabric: a unified, AI-powered data platform to simplify data management and analytics.

Microsoft Fabric is an end-to-end intelligent data platform with a suite of cloud services and tools for every data lifecycle stage: ingestion, preparation, storage, analysis, and visualization.

Now, unlock the full potential of Microsoft Fabric with Sparkle's Fabric Ignition Packs. Designed for data professionals, our solutions provide structured guidance, best practices, and hands-on implementation to accelerate your data journey. Whether you need expert-led workshops, reference data management, data quality assurance or readily available financial reporting,

Discover Sparkle's tailored packages to fit your needs.

Your Fabric Launch Sequence

1. Read this Brochure

Learn how our Fabric Ignition Packs can help you fast-track your Fabric adoption with expert-led enablement and best practices.

2. Plan an Introductory Meeting

Schedule a free consultation with our specialists to discuss your goals, challenges, and how we can support your Fabric journey.

3. Funding & Subsidy Exploration

We explore potential funding opportunities and subsidies that can help reduce costs and make your Fabric investment even smarter.

4. Contract & Planning

We formalize the engagement and build a customized roadmap with clear milestones for a structured, predictable implementation.

5. Kickstart your Fabric Adoption

Accelerate your Fabric journey with expert guidance for a seamless adoption.

**Let Sparkle land
Microsoft Fabric
smoothly into your
IT landscape and get it
right from the start.**

Fabric Ignite Packs Overview

Package	Description	Pricing
Ideation session	Session of 3h to explore the Fabric capabilities with your needs	1 KEUR or Free
Fabric Framework Setup	Setup of a Fabric medallion architecture	S - 15 KEUR M - 22.5 KEUR L - 30 KEUR
Reference Data Management	Manage reference data with easy-to-use tools	Contact us
Data Quality Management	Ensure data accuracy through automated checks	Contact us
Future Finance Reporting	Standardized data extraction and financial reporting on Odoo, ExactOnline or StandardBooks	Contact us
Workshops	Workshops of your choice (optional extra coaching days)	1 KEUR per workshop

Ideation Session

Executive Summary

Transform your business operations through AI-powered intelligence. This 3-hour collaborative workshop helps you unlock AI-driven value from your data by identifying business processes for optimization, exploring agentic AI capabilities, and mapping high-impact use cases that deliver measurable outcomes.

This session serves as a standalone discovery exercise or kickoff to any Fabric Ignite Pack, ensuring your AI investment drives tangible business value.

Deliverables

- ✦ **Summary report** capturing your business goals and data challenges, providing a clear understanding of the current possibilities.
- ✦ **Prioritized list** of 2–3 Fabric high-level use cases helping you focus on the most promising opportunities.
- ✦ **AI-Potential Assessment**
Evaluation of business processes and AI optimization potential.
- ✦ Suggested **next steps** and relevant Fabric Ignite Pack recommendations that can support your initiatives

Benefits

This workshop provides an opportunity to explore fabric innovation and technology with experts. You'll gain insights into solutions to current challenges, and develop ideas that can drive future projects and transform your business processes. It's a chance to expand your knowledge while identifying valuable use cases, and accelerating your time to value.

Audience

Business Leaders (process owners, decision-makers), **Data & Analytics Teams** (engineers, analysts), **IT Leaders** (architects, strategists), **Domain Experts** (finance, operations, sales, supply chain)

In large organizations we can focus on a specific domain.

Pricing

1.000 EUR excl VAT (standalone)

FREE when combined with a Fabric Ignite Pack or workshop

Fabric Framework Setup

Executive Summary

Organizations adopting Microsoft Fabric face the challenge of setting up a robust, scalable data foundation. Our Fabric Framework Setup Enablement Package ensures that customers start with best practices, leveraging a metadata-driven medallion architecture powered by dbt. This accelerates adoption, reduces trial and error, and ensures an optimal, future-proof data platform.

Package Variants

Small - Essential Fabric Setup

- Initial configuration of Microsoft Fabric environment
- Setup of Fabric Lakehouse and Warehouse
- Basic medallion architecture (bronze/silver/gold) with dbt framework
- Initial data ingestion from one source system
- End-to-end data flow from bronze to gold, but without complex transformations
- Short training session for the customer team (1 session, 2 hours)
- Basic documentation of the setup

Medium - Advanced Fabric Enablement

Includes everything in S, plus:

- Implementation of a dimensional data model
- Standard Power BI report for data visualization
- Extended dbt transformations with basic business rules
- Detailed documentation and handover to internal teams

Large - Enterprise Fabric Framework Setup

Includes everything in M, plus:

- CI/CD pipelines setup
- Integration of monitoring solutions
- Hands-on workshop to enable maintenance and extension of the framework

Key Benefits

- ✓ Start with a proven, best-practice architecture instead of trial & error
- ✓ Accelerate Microsoft Fabric adoption with an optimized data foundation
- ✓ Minimize long-term risks with a scalable, maintainable setup
- ✓ Direct support and knowledge transfer to internal teams

Pricing

- **Small** : 15.000 EUR excl VAT
- **Medium** : 22.500 EUR excl VAT
- **Large** : 30.000 EUR excl VAT

Reference Data Management

Executive Summary

Efficient reference data management is crucial for maintaining consistency and accuracy across enterprise systems. Sparkle's Reference Data Management Enablement Package empowers businesses to take full control of their reference data, ensuring seamless updates, structured data organization, and compliance with business rules. This package provides a fully customizable framework, allowing users to manage reference data via an intuitive interface while ensuring governance and security.

Features

- ✓ **User-friendly reference table management** – Edit and maintain reference data effortlessly
- ✓ **Excel-like editing interface** – Simplified interaction for business users
- ✓ **Role-based access control** – Secure and manage user permissions
- ✓ **Automated data ingestion** – Seamlessly integrate new data sources (*)
- ✓ **Relationship management** – Define and enforce dependencies between reference tables

(*) automated data ingestion is possible to implement in the framework, but the actual setup is not included in the fixed price

Deliverables

- 📌 Full source code of the reference data management framework
- 📌 Infrastructure deployment – Includes Power App, Azure Function, and Azure SQL Database
- 📌 Initial setup – Configuration of 20 reference tables
- 📌 Corporate visual identity setup – Branding and UI customization
- 📌 Code handover & end-user training – Ensure smooth adoption within your organization

Data Quality Management

Executive Summary

Efficient data quality management is crucial for maintaining consistency and accuracy across enterprise systems. Sparkle's Data Quality Management Enablement Package empowers businesses to take full control of their data quality, ensuring seamless validation, structured data organization, and compliance with business rules. This package provides a fully customizable framework, allowing users to monitor and manage data quality via an intuitive interface while ensuring governance and security.

Features

- ✓ **Data Quality Checks** – Each check consists of an actual query, a comparison query, and an optional diagnostic query.
- ✓ **Data Quality Check Management** – Includes metadata such as type, department, responsible owner, and status.
- ✓ **Results Storage & Visualization** – Data checks are stored and displayed in lists and detailed views.
- ✓ **Connections** – Supports SQL-based data sources for flexible integration.
- ✓ **User & Department Management** – Allows user access control and grouping into departments.
- ✓ **Alerts & Notifications** – Alerts can be sent via email, Teams, or other Power Automate-supported connections.
- ✓ **Scheduling** – Checks can be scheduled at defined times or triggered by specific events.
- ✓ **Power BI Integration** – Data check results can be visualized in Power BI dashboards.

Deliverables

- ✦ Infrastructure deployment – Includes Power App, Azure Function, and Azure SQL Database
- ✦ Initial setup – Configuration of 10 data quality checks and 3 source connections
- ✦ Corporate visual identity setup – Branding and UI customization
- ✦ Code handover & end-user training – Ensure smooth adoption within your organization

(* automated data ingestion is possible to implement in the framework, but the actual setup is not included in the fixed price

Future Finance Reporting

Executive Summary

Managing financial data effectively is crucial for business success. Sparkle's Future Finance Reporting Fabric Enablement Package provides an end-to-end framework that extracts financial data from leading accounting platforms via their APIs, seamlessly integrates it into Microsoft Fabric, and delivers out-of-the-box financial reporting. This package empowers businesses with a ready-to-use financial analytics solution, enhancing visibility and decision-making while ensuring governance and security.

Features

- ✓ **Automated Data Extraction** – Connect to supported accounting platforms' APIs to extract financial data effortlessly.
- ✓ **Prebuilt Fabric Framework** – Standardized data models and preconfigured data pipelines for seamless integration.
- ✓ **Role-Based Access Control** – Ensure secure and compliant data access across teams.
- ✓ **Financial Report Templates** – Out-of-the-box dashboards and reports aligned with Future Finance standards.
- ✓ **Scalable & Customizable** – Adaptable to evolving business needs and additional data sources.

Deliverables

- 📌 Full source code of the financial data management framework.
- 📌 Infrastructure deployment – Includes prebuilt pipelines, OneLake configuration, Lakehouse and Warehouse workspace, and Power BI reports.
- 📌 Initial setup – Configuration of core financial reporting metrics.
- 📌 Corporate visual identity setup – Branding and UI customization.
- 📌 Code handover & end-user training – Ensure smooth adoption within your organization.

***What our clients
have to say:***

"With Sparkle, we introduced speed and efficiency in the setup of a modern data platform. The data platform is fed in real time and has not only delivered new insights, but has also become a crucial part of our enterprise architecture."

Jean-Philippe Bovsovers
CTO at VAR

Fabric Workshops

Executive Summary

Empower your team with hands-on workshops covering key Microsoft Fabric topics. Each workshop is designed to provide deep technical knowledge and practical implementation guidance. The package includes five workshops of your choice, with the option to add personalized coaching sessions. The workshop about security is delivered by Secwise, expert in Microsoft security.

Available Workshops

- **Introduction into Fabric** - Understanding the basics of Microsoft Fabric and its core components.
- **Architecture** - Designing a scalable and efficient Fabric-based data platform.
- **Data Ingestion & Data Engineering** - Best practices for bringing data into Fabric and transforming it for analytics.
- **Data Visualization** - Building effective reports and dashboards for data-driven decision-making.
- **AI capabilities & data science** - Leveraging AI tools and data science methodologies within Fabric.
- **Data Governance with Fabric & Purview** - Structuring your Fabric environment for security and scalability.
- **Secure your Fabric data environment** - Learn best practices for access control, network security, and data protection.
- **Setup a data agent** - Learn how to connect on-premises and cloud data sources securely to Microsoft Fabric, configure the agent, and manage data access

Pricing

1000 EUR excl VAT for 1 workshop

Conclusion

Our workshops provide a structured approach to Microsoft Fabric, ensuring your team gains the necessary skills to implement and optimize their data environment effectively.

Looking for more? If you need additional workshops or a tailored enablement program, reach out to us to discuss custom training solutions designed for your business needs.

Sparkle

Your trusted partner in data excellence

Sparkle is your go-to expert for data consultancy, helping organizations unlock the full potential of their data. With deep expertise in Microsoft technologies and a broad range of data-driven solutions, we ensure your business stays ahead in the digital age.

Funding

Organizations working with Sparkle can benefit from funding programs designed to reduce costs and maximize value:

💰 **Microsoft Funding** – Eligible customers can access Microsoft funding through Sparkle to support their data projects.

Why Choose Sparkle?

- ✦ Proven expertise in data consultancy and Microsoft solutions.
- ✦ Tailored strategies for long-term success.
- ✦ Access to exclusive funding opportunities to maximize your investment.

Let's unlock the full potential of your data together!
